

CHIPBOARD SCREWS

The QZ Combi chipboard screw can be used for all kinds of screw jobs, but most of all has value when working with MDF or hardwood.

MDF and hardwood can sometimes split when screwing in, but because of the smart detail solutions of the QZ Combi the chance of splitting is minimalised. The QZ Combi slides effortlessly and quick into the material and has a uniquely formed head with nibs. Its thread form and cutter point are specially created to prevent splitting of the material.

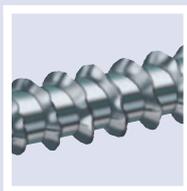

3 STRONG FEATURES

1 | NARROWED HEAD WITH NIBS

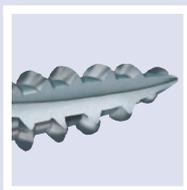

The narrowed head with nibs takes care of a neat and good endresult. The QZ Combi easily sinks itself into the material and keeps a good pulling strength.

2 | THREAD WITH FLUTES

The QZ Combi has flutes at the beginning of the thread, that limit sideways friction in the material. Also every screw has a Hostafalon TF 5032 wax. The resistance when screwing in will be substantially reduced.

3 | SPECIAL POINT (CUTTER POINT)

The QZ Combi has a special cutter point that mills out the material when screwing in. That will limit sideways friction in the material and the risk of splitting will be minimalised.

AVAILABLE IN THE FOLLOWING SIZES:

Diameter	3.0	3.5	4.0	4.5	5.0	6.0
Length	16	16	16	30	40	80/65
	20	20	20	35	50/35	90/65
	30	25	25	40	60/45	100/65
	Full thread/	30	30	45/30	70/60	120/65
	Partial thread	35	35	50/35	80/60	
		40	40/28		90/60	
	50/40	45/30		100/60		
		50/35				
		60/40				
		70/48				

The QZ Combi is standard with a TX recess in full thread or, depending on the length, in partial thread.

PACKAGING

Packed per 200, 100 of 50 pieces, depending on the size. Packed in strong blue boxes, with QZ logo. Standard with very distinct and informative label with barcode. Including FREE bit in every box.
